

JYOTHI PRAKASH T

Full Stack Developer | MERN Stack | Laravel | AI & LLM Integration

jyothiprakash1812@gmail.com • +91 9629017245 • India • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 2.9+ years of experience building scalable MERN and Laravel applications, optimizing backend performance by up to 80%, and delivering secure REST APIs, AI integrations, and enterprise ERP solutions. Proven expertise in React.js, Node.js, Express.js, TypeScript, PostgreSQL, MongoDB, JWT authentication, RBAC, and Groq LLM API. Experienced with AWS S3, CI/CD pipelines (GitHub Actions), and clean architecture patterns. Currently upskilling in AWS, Docker, and Kubernetes to build cloud-native, production-grade applications.

PROFESSIONAL EXPERIENCE

Software Developer | Elroi Software Solutions

Jul 2025 – Present

- Developed and maintained 8+ ERP modules (CRM, Payroll, Sales, Purchase, Task Management) using Laravel and PostgreSQL.
- Reduced API response times by up to 80% through database query optimization, N+1 query resolution, and Redis caching.
- Refactored core business logic using Service and Repository Patterns, improving maintainability and reducing technical debt.
- Implemented bulk operations and automated payroll workflows — salary processing, deductions, and payslip generation.
- Collaborated across cross-functional teams in an Agile environment to deliver production-ready enterprise software on schedule.

Software Developer | SKATTECH IT Services

Sep 2023 – Jun 2025

- Delivered 4 full-stack production applications using MERN Stack and Laravel with TypeScript, serving students, teachers, admins, drivers, and vendors.
- Built 25+ reusable React components with Redux Toolkit and Formik, reducing feature development time and improving UI consistency.
- Designed secure RESTful APIs with JWT authentication, refresh tokens, and role-based access control (RBAC) for multi-role platforms.
- Integrated Razorpay payment gateway for online fee collection and AWS S3 for scalable file storage across platforms.
- Implemented WebSocket-based real-time updates for ride tracking and notifications; optimized MongoDB queries via indexing.

PROJECTS

TravelPM – AI Travel Product Management System [[Live Demo](#)] — Personal Project

React.js, Node.js, Express.js, PostgreSQL, Groq API (Llama 3.3 70B), Tailwind CSS, Vite

- Built an AI-powered full-stack travel management system with 15+ REST APIs, complete CRUD lifecycle, automatic expiry management, and a live dashboard tracking Total, Active, and Expired product counts.
- Integrated Groq API (Llama 3.3 70B) for an AI Product Generator (form auto-fill from plain-English prompts) and a natural language AI Search endpoint — reducing manual data entry significantly.
- Architected a clean Express.js + PostgreSQL backend with dedicated AI endpoints (/ai/generate, /ai/search), separating AI logic from core CRUD services for maintainability and scalability.

Abacux – ERP Accounting Software — Elroi Software Solutions

Laravel, PostgreSQL, GitHub Actions, jQuery, Bootstrap

- Developed a full ERP suite covering CRM, Payroll, Sales, and Purchase modules; implemented end-to-end payroll workflows — deductions, salary processing, and digital payslip generation.
- Optimized database performance via query caching and indexing; refactored using Service & Repository patterns; automated deployment via GitHub Actions CI/CD.

School Management System — SKATTECH IT Services

React.js, Node.js, Express.js, MongoDB, TypeScript, AWS S3

- Built a multi-role school management platform (students, teachers, staff) with RBAC, Razorpay payment integration, and AWS S3 for document storage.
- Implemented WebSocket real-time updates for attendance and notifications; built and optimized 20+ REST APIs for academic management workflows.

Food Ordering & Taxi Booking Platforms — SKATTECH IT Services

React.js, Node.js, Laravel, MongoDB, MySQL, Redux Toolkit, JWT, GitHub Actions

- Food Ordering: full ordering flow with authentication, cart, order tracking, search/filter/pagination — MongoDB performance optimized via indexing.
- Taxi Booking: multi-role system (Admin, Vendor, Driver) with ride bidding, acceptance, and real-time tracking; automated deployment via GitHub Actions CI/CD.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP
Frontend: React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Vite, jQuery, Formik
Backend: Node.js, Express.js, Laravel, PHP
Databases: MongoDB, PostgreSQL, MySQL, SQLite, Redis
Cloud & DevOps: AWS S3, GitHub Actions, CI/CD Pipelines
AI & Integrations: Groq API, LLM Integration, GitHub Copilot, Cursor AI, REST APIs, Razorpay
Auth & Security: JWT, Refresh Tokens, Role-Based Access Control (RBAC)
Architecture: MERN Stack, Clean Architecture, Repository & Service Pattern, ERP Systems, Performance Optimization
Tools: JIRA, Postman, Git, VS Code, Cursor AI

KEY ACHIEVEMENTS

- 80% API response time reduction — eliminated N+1 queries, added Redis caching, and rewrote slow endpoints in ERP platform.
- 25+ reusable React components built across projects, reducing feature development time and improving cross-project UI consistency.
- 15+ REST APIs designed and deployed for TravelPM with dedicated AI endpoints powering LLM-based product generation and natural language search.
- Skeleton Loading + Lazy Loading implementation reduced perceived page load time and deferred non-critical resource loading.
- Restructured component trees and reduced DOM weight, improving browser rendering performance and runtime responsiveness.
- Implemented automated CI/CD pipelines via GitHub Actions, reducing manual deployment effort and ensuring consistent delivery.

EDUCATION

M.Sc. Software Systems | Kongu Engineering College, Perundurai
2019 – 2024 | CGPA: 7.2

CURRENTLY UPSKILLING

- AWS — EC2, IAM, VPC, RDS, Lambda (Cloud Practitioner in progress)
- Docker & Docker Compose — containerization, multi-stage builds
- Kubernetes (CKA Prep) — pods, deployments, services, ingress
- Cloud-Native Architecture — microservices, container orchestration
