

JYOTHI PRAKASH T

Full Stack Developer | MERN Stack & Laravel

jyothiprakash1812@gmail.com | +91 9629017245 | India

PROFESSIONAL SUMMARY

Full Stack Developer with 2.9+ years of experience building scalable enterprise applications using MERN Stack and Laravel. Experienced in designing REST APIs, optimizing application performance, implementing authentication and authorization, and developing ERP systems. Passionate about writing clean, maintainable, and scalable code.

PROFESSIONAL EXPERIENCE

Software Developer | Elroi Software Solutions Jul 2025 – Present

- Developing scalable ERP solutions using Laravel and PostgreSQL for business process automation.
- Improved application performance by optimizing database queries, resolving N+1 issues, and implementing caching strategies, reducing API response times by up to 80%.
- Refactored core modules using Service and Repository Patterns, improving code maintainability and scalability.
- Designed and implemented secure backend workflows for CRM, Payroll, Sales, Purchase, and Task Management modules.
- Collaborated with cross-functional teams to deliver production-ready enterprise applications.

Software Developer | SKATTECH IT Services Sep 2023 – Jun 2025

- Developed full-stack applications using MERN Stack and Laravel with TypeScript support.
- Built secure RESTful APIs with JWT authentication and role-based authorization mechanisms.
- Designed responsive user interfaces using React.js, Redux Toolkit, Axios, and modern React Hooks.
- Implemented scalable backend services using Node.js, Express.js, MongoDB, and MySQL.
- Collaborated with development teams to deliver maintainable and business-focused software solutions.

PROJECTS

Abacux – ERP Accounting Software — *Elroi Software Solutions*

Laravel, PostgreSQL, GitHub Actions, jQuery, HTML, CSS, Bootstrap

- Developed ERP modules including CRM, Payroll, Sales, Purchase, and Task Management.
- Implemented payroll workflows including salary processing, deductions, and payslip generation.
- Optimized database queries and caching mechanisms to improve application performance.
- Refactored business logic using Service and Repository architecture patterns.
- Built bulk operations and workflow management features for enterprise use cases.

School Management System — *SKATTECH IT Services*

React.js, Node.js, Express.js, MongoDB, TypeScript, AWS S3

- Developed a multi-role School Management platform for students, teachers, and staff.
- Implemented secure authentication and authorization using role-based access control.
- Integrated Razorpay payment gateway for online fee collection.
- Developed REST APIs and optimized CRUD operations for academic management workflows.
- Implemented WebSocket-based real-time updates to improve user experience.

Food Ordering Platform — *SKATTECH IT Services*

React.js, Node.js, Express.js, MongoDB, Redux Toolkit, JWT

- Built a complete food ordering platform with authentication, cart management, and order tracking.
- Implemented search, filtering, pagination, and product management features.
- Optimized MongoDB queries using indexing and Mongoose best practices.
- Built RESTful APIs for efficient food browsing and order processing.

Taxi Booking Application — *SKATTECH IT Services*
Laravel, MySQL, GitHub Actions, jQuery, HTML, CSS, Bootstrap

- Developed a multi-role taxi booking system supporting Admin, Vendor, and Driver operations.
- Implemented ride booking, bidding, acceptance, and real-time tracking workflows.
- Built RESTful APIs and optimized database operations using Laravel Eloquent ORM.
- Configured CI/CD pipelines using GitHub Actions for deployment automation.

TECHNICAL SKILLS

Frontend	React.js, React Native, Redux Toolkit, HTML5, CSS3, JavaScript, TypeScript, jQuery, Formik
Backend	Node.js, Express.js, PHP, Laravel
Databases	MongoDB, PostgreSQL, MySQL, SQLite
API & Auth	REST APIs, GraphQL, JWT Authentication, Role-Based Access Control
DevOps & Tools	GitHub Actions, AWS S3, Git, JIRA, Postman, CI/CD, Redis
Concepts	MERN Stack, OOP, Performance Optimization, Clean Architecture, Repository & Service Pattern, Caching, Reusable Components
AI Tools	GitHub Copilot, Cursor AI, AI-Assisted Development

SOFT SKILLS

Problem Solving • Team Collaboration • Agile Development • Code Reviews • Communication

ACHIEVEMENTS

- Integrated Skeleton Loading to deliver smooth page transitions while switching between pages, significantly reducing perceived page slowness and improving user experience.
- Implemented Lazy Loading for select elements and on-demand data fetching, reducing initial page load time and deferring non-critical resource loading.
- Reduced DOM weight by eliminating unnecessary nodes and restructuring component trees, resulting in faster browser rendering and improved runtime performance.

EDUCATION

M.Sc. Software Systems <i>Kongu Engineering College, Perundurai</i>	CGPA: 7.2 2019 – 2024
